Summary

Problem

Medical readiness is an integral component of wartime planning. Projection of the anticipated battle injuries and diseases within a theater of operations will allow prepositioning of medical resources.

Objective

DEPMEDS is a Department of Defense initiative designed to project the medical requirements for an operational scenario and package the needed supplies in modular assemblages. The DEPMEDS system is based on 348 Patient Conditions expected to encompass the injuries and diseases likely to be present which require a quantifiable allocation of medical resources. The object of the present study is to determine which hospital admissions do not readily convert to Patient Conditions.

Approach

The Marine Corps Inpatient Medical Data file maintained by the Naval Health Research Center was the source of an extract of inpatient records during the Vietnam conflict. The hospitalization diagnoses which did not readily convert to Patient Condition (PC) Codes were examined and an alternative system encompassing all admissions was investigated.

Results

The multiplicity and specificity of Patient Condition components did not generally conform to the diagnoses system currently in use at Navy inpatient facilities. Some PC criteria could be accommodated using similar yet inexact matches to International Classification of Diseases (ICD-9) diagnoses; other PC criteria were wholly unascertainable. Further, some ICD-9 diagnoses are unaccounted for using the PC system. A system based on ICD-9 classifications and encompassing all admissions was proposed.

Conclusions

Any system projecting the medical requirements of an operational scenario must include all injuries and diseases expected to be incurred. Presently, Navy treatment facilities use the ICD-9 coding schema and battle injury and disease projections should be tied to this format.

**MEDICAL RESOURCE PLANNING: THE NEED TO USE
A STANDARDIZED DIAGNOSTIC SYSTEM**

Programming the medical requirements for a military operation necessitates accurate projections of the battle injuries and diseases expected to be incurred. Military planners are best able to estimate the needed supplies, equipment, and medical personnel if reliable rates of casualty and disease can be predicted. The critical nature of medical preparedness is underscored in several articles detailing the need for combat-ready surgeons and facilities^{1,2,3}.

The Department of Defense has undertaken a quad-service initiative designed to project, and make readily deployable, the equipment and supplies needed to establish treatment facilities within operational theaters. Deployable Medical Systems (DEPMEDS) is a modular system which determines the medical resources needed based on the expected injuries and illnesses⁴. The required supplies are projected from algorithms which allocate resources according to the anticipated frequencies of occurrence within a set of Patient Conditions (PCs)⁵. The PCs, currently numbering in excess of three hundred, and the necessary medical resources are derived from input by all service branches.

A recent investigation retrospectively determined the frequencies of Patient Conditions among U.S. Marines serving in Vietnam⁶. This study indicated that there were 51,976 battle injury hospitalizations and 108,956 inpatient admissions for Disease and Non-Battle Injury (DNBI) causes. Patient condition codes accounted for seventy three percent of the battle injuries and sixty-three percent of the DNBI hospitalizations. The current investigation seeks to: 1) determine which PC criteria do not readily map to the diagnostic coding system used in Navy inpatient treatment facilities; 2) specify which hospitalizations are not accounted for by the Patient Condition system, and 3) recommend a schemata that will differentiate among injuries and diseases yet account for all hospitalizations.

Patient Conditions

The set of Patient Conditions presently under consideration by the Defense Medical Standardization Board comprises 348 injuries and illnesses

likely to present themselves in a theater of operations. The injuries include both combat-induced wounds and non-battle related trauma. Table 1 is a listing of descriptions for the 348 patient conditions. A few PC numbers have been intentionally left blank so that as new disorders arise this system may more easily accommodate them. It can readily be seen from this list that many of the patient conditions are composed of multiple criteria. Likewise, it is also apparent that some PCs are very specific in their descriptions of battle traumas. Both the multiplicity and specificity of patient condition components are typified by PC's 1 and 60: PC 1 is "multiple fragment wound brain, multiple fragment wound chest, sucking chest wound, and pneumohemothorax, and, PC 60 is "multiple fragment wound brain, multiple fragment wound abdomen, shock, and penetrating perforating wound liver." Undoubtedly, projection of very specific cases of trauma allows for the greatest precision in determining needed medical resources. However, the trade-off for such a high degree of detail is that some wounds will not meet the criteria for any one of the patient conditions.

Furthermore, it should be noted that the PC coding schema is quite different than the diagnostic nomenclature in use at Naval Medical facilities. The diagnoses system used at Navy inpatient centers is the International Classification of Diseases, Ninth Revision (ICD-9). For a hospitalization to meet all the criteria of a detailed patient condition it would require multiple diagnoses to have been assigned. This requirement is borne out by Table 2 which delineates which PC components are accommodated by the ICD-9 nomenclature and the numerical diagnoses that correspond to the components. Patient Condition 11, for instance, requires "Multiple Fragment Wound Chest," Pneumohemothorax," and "Wound Spleen open"; therefore, a patient must have three ICD-9 diagnoses to be classified into this PC.

Non-Determinable PC Criteria

In addition to there being many traumas within the PC coding system that require multiple diagnoses, a number of injuries and illnesses specify criteria without ICD-9 equivalents. Some of these PCs have components with similar but not exact ICD-9 parallels, while other PC elements are completely outside the scope of the ICD-9 diagnostic system.

Examples of PC criteria with similar but not exact ICD-9 equivalents are found in PC 24 and PC 25 which call for "soft tissue injury to upper

limbs resulting from fragments" and "multiple nonperforating fragment wounds of skin and soft tissue." The investigation of patient conditions among Marines in Vietnam used the ICD-9 diagnoses "MFW, open wound shoulder/arm," and "MFW superficial injury", respectively as the parallel components. There were numerous instances of similar yet inexact translations from PC component to ICD-9 diagnosis. As in the aforementioned examples, some translation discrepancies are in terminology only. In these cases the ICD-9 description and the patient condition are essentially the same and the treatment resources would not be expected to differ.

Among other patient conditions, however, the mapping to ICD-9 diagnoses was far less precise. By illustration, the difference between PC 75 and PC 76 is that the former stipulates the open wound to the forearm is "severe, requiring major debridement," and PC 76 is "moderate, not requiring major debridement,"; because ICD-9 diagnoses do not indicate severity or treatments, the closest conversions are "with complications" and "without complications." In these instances, it is uncertain whether the resources required for a given patient condition and its concomitant ICD-9 translation would indeed be the same.

Finally, there are numerous PC criteria that simply have no corresponding ICD-9 codes. Some of these are due to patient condition criteria actually being symptoms (PC 34 includes "without focal neurological deficit", for example), which are generally not found in the ICD-9 system. Other PC components not translatable to ICD-9 codes are due to the degree of detail accorded the PCs (patient condition 69 calls for an open wound of arm that is "penetrating, lacerated" while ICD-9 simply indicates whether the wound is "open" or not). These two types of discrepancies should not bear too greatly on the resources required. However, some PC criteria without equivalents could have a significant effect on the medical supplies or equipment needed. This category would include PC 95 for example, defined as "injury lung closed with pneumothorax," which has an ICD-9 parallel, but also states "one lung with pulmonary contusion and acute, severe respiratory distress", which is outside the scope of the ICD-9 description. Complications of traumas such as this would be expected to influence the resources needed to treat the basic condition.

The patient condition criteria not discernible by ICD-9 diagnoses are displayed in Table 3. This listing includes those components which have no ICD-9 equivalencies as well as those with less than exact translations.

ICD-9 Diagnoses Not Converted to Patient Conditions

In addition to there being Patient Conditions that received less than a full accounting in the conversion process, many ICD-9 diagnoses did not map to any of the PCs. While it is the goal of the DEPMEDS project to include only those conditions likely to be present and which require a quantifiable allocation of resources to treat, there were a substantial number of disorders that would be allocated no resources whatsoever with the PC system. Specifically, in the aforementioned Vietnam study there were 13,796 battle traumas as well as 40,077 DNBI hospitalizations among Marines that did not convert to patient condition codes.

The battle injury diagnoses that did not translate to PCs were of two main types: 1) injuries that were multiple and or ill-defined such as "open wounds lower limbs, both multiple" and "fracture of lower limbs/lower with upper limb", and 2) wounds that did not meet the specific criteria within a Patient Condition--the PC system accommodates "fracture tibia and fibula, closed" yet there is no PC that accounts for "fracture tibia and fibula, open". Among the diseases not accounted for, most simply did not fit into any of the patient conditions. Table 4 indicates the combat traumas and corresponding frequencies not tallied among the PCs while Table 5 is a similar listing for diseases and non-battle injuries.

ICD-9 Based Categories

As long as military treatment facilities record hospital admissions as ICD-9 diagnoses there cannot be a direct correspondence to a medical resource allocation system based on a different coding schema. This lack of compatibility can only be remedied by basing the supplies, equipment, and medical personnel needed on the diagnostic system actually used at treatment facilities.

It is not possible to have a disorder category for every combination of diagnoses that might occur. For instance, a casualty might receive diagnoses of a fractured arm, open wound shoulder, injury nerves of arm, and dislocation elbow; to have a resource allocation system based on such a level of detail would require many thousands of potential conditions. Therefore, some traumas must be categorized sacrificing some detail. A

workable system might base needed resources on the primary wounds of hospital admissions with supplies augmented for secondary conditions.

A medical disorder system is proposed which funnels all individual ICD-9 diagnoses into categories of trauma and diseases. This system, 98 categories of battle injuries and 216 DNBI categories, incorporates all primary disorders found in the PC system. Tables 6 and 7 indicate the ICD-9 diagnoses that comprise each diagnostic category. Table 8 is a display of the frequency and percent of total battle injuries accounted for by each combat trauma category among U.S. Marines in Vietnam. The rate of occurrence per 1000 men per day of each battle injury is also shown in Table 8, while Table 9 indicates the frequencies and percentages of secondary battle injury diagnoses. Frequencies, percentages, and rates for the DNBI categories are similarly seen in Tables 10 and 11.

Discussion

Medical resource needs projection is an integral component of the planning for any operational scenario. With insufficient equipment, supplies, and/or medical personnel there would be a higher DOW (Died of Wounds) rate, a greater likelihood that some injuries would be permanently disabling, and less immediate returns to duty among those personnel with diseases and minor injuries.

The concept of projecting medical resource allocations from predicted rates of injuries and disease is a sound one. Accurate battle injury and disease prediction may be best accomplished by using a comparable battle scenario from the past to estimate the medical needs for a future operation.

The system currently in place to record hospital admissions among Navy and Marine Corps personnel uses the International Classification of Diseases - Ninth Revision (ICD-9). More than twelve thousand individual diagnoses exist and a hospitalization record may include as many secondary diagnoses as necessary. As such, there is a virtually limitless number of potential diagnosis combinations that might occur. Consequently, projections of medical resources should be tied to a finite number of primary diagnoses rather than a set of multi-criteria conditions which would allow some hospitalizations to remain unquantified. Use of primary diagnoses, ensures that all possible hospitalizations are considered. With this type of system those admissions which do not require a quantifiable amount of supplies to be allocated may be factored into the resource

algorithms accordingly while at the same time the needed bed space would not be overlooked. Resource projections based on primary diagnoses would require that supplies be supplemented in accordance with the types and numbers of secondary diagnoses anticipated. The International Classification of Diseases system is an accepted standard and is unlikely to be replaced in the near future. While the ICD-9 nomenclature does not include the severity ratings and explicitness of many of the PCs, it is far more comprehensive and should be used in the determination of medical resource allocations.

Current efforts underway at the Naval Health Research Center attempt to determine casualty rates for various operational scenarios. Knowledge of injury and disease rates of past conflicts will enable medical planners to more accurately project rates for future operations.

TABLE 1. PATIENT CONDITION CODES AND DESCRIPTIONS

<u>PC</u>	<u>PATIENT DESCRIPTION</u>
001	MFW brain and chest with sucking chest wound and pneumothorax
002	MFW brain and abdomen with penetrating, perforating wound, colon
003	MFW brain and abdomen with penetrating, perforating wound, kidney
004	MFW brain and abdomen with penetrating, perforating wound, bladder
005	MFW brain and abdomen with shock and penetrating, perforating wound, spleen
006	MFW brain and abdomen with shock and penetrating, perforating wound, liver
007	MFW brain and lower limbs requiring bilateral above knee amputations
008	MFW chest with pneumothorax and abdomen with penetrating wound, colon
009	MFW chest with pneumothorax and abdomen with penetrating, perforating wound, kidney
010	MFW chest with pneumothorax and abdomen with penetrating, perforating wound, bladder
011	MFW chest with pneumothorax and abdomen with penetrating, perforating wound, spleen
012	MFW chest with pneumothorax and abdomen with penetrating, perforating wound, liver
013	MFW chest with pneumothorax and limbs with fracture and vascular injury
014	MFW abdomen with penetrating, perforating wound of colon and bladder
015	MFW abdomen with penetrating, perforating wound of colon and spleen
016	MFW abdomen with penetrating, perforating wound of colon and liver
017	MFW abdomen and limbs with penetrating, perforating wound of colon and open fracture and neurovascular injury of salvageable lower limb

PCPATIENT DESCRIPTION

- 018 MFW abdomen and pelvis with penetrating, perforating wound of liver and kidney
- 019 MFW abdomen and pelvis with penetrating, perforating wounds of spleen and bladder
- 020 MFW abdomen, pelvis, limbs, with fracture and neurovascular injury, limb salvageable, and penetrating wound, kidney
- 021 MFW abdomen, pelvis, limbs, without fracture or neurovascular injury, and penetrating, perforating wound, bladder
- 022 MFW abdomen and lower limbs, with fracture and nerve injury, with penetrating wound of spleen
- 023 MFW abdomen and limbs, without fracture or nerve injury, with penetrating wound of liver
- 024 MFW chest with pneumohemothorax, soft tissue injury to upper limbs, and penetrating wound of brain
- 025 MFW chest with pneumohemothorax, soft tissue injury to upper limbs, and abdomen, with wound of colon
- 026 MFW chest with pneumohemothorax, pelvis and abdomen, with wound of colon and bladder
- 027 MFW abdomen and chest with multiple organ damage
- 028 Multiple, nonperforating fragment wounds of skin and soft tissue
- 029
- 030
- 031 Cerebral concussion, closed, with/without nondepressed linear skull fracture severe - loss of consciousness from 2 - 12 hours
- 032 Cerebral concussion, closed, with/without nondepressed linear skull fracture moderate - loss of consciousness less than 2
- 033 Cerebral contusion, closed, with/without nondepressed linear skull fracture severe - loss of consciousness greater than 24 hours, with focal neurological deficit

PCPATIENT DESCRIPTION

- 034 Cerebral contusion, closed, with/without nondepressed linear skull fracture moderate - loss of consciousness from 12 - 24 hours, without focal neurological deficit
- 035 Cerebral contusion, closed, with intracranial hematoma, with/without nondepressed linear skull fracture severe - large hematoma (including epidural hematoma) with rapidly deteriorating comatose patient
- 036 Cerebral contusion, closed, with/without nondepressed linear skull fracture severe - loss of consciousness greater than 24 hours, with/without focal neurological deficit
- 037 Cerebral contusion, closed, with depressed skull fracture severe - with associated intracerebral hematoma and/or massive depression
- 038 Cerebral contusion, closed, with depressed skull fracture moderate - no associated hematoma or significant effect from depression
- 039 Cerebral contusion with open skull fracture severe - with intracranial fragments and/or depressed skull fracture
- 040 Cerebral contusion with open skull fracture moderate - without intracranial fragments and/or depressed skull fracture
- 041 Wound, scalp, open without cerebral injury or skull fracture severe - scalped with avulsion of tissue
- 042 Wound, scalp, open without cerebral injury or skull fracture moderate - scalp laceration
- 043 Fracture, facial bones, closed, exclusive of mandible, severe - multiple fractures
- 044 Fracture, facial bones, closed, exclusive of mandible, moderate - single fracture
- 045 Wound, face, jaws, an neck, open, lacerated with associated fractures, excluding spinal fractures, severe - with airway obstruction
- 046 Wound, face, jaws, and neck, open, lacerated with associated fractures, excluding spinal fractures, moderate - without airway obstruction
- 047 Wound, face and neck, open, lacerated, contused without fractures, severe - with airway obstructions and/or major vessel involvement

PCPATIENT DESCRIPTION

- 048 Wound, face and neck, open, lacerated, contused without fractures, moderate - without airway obstruction or major vessel involvement
- 049 Fracture, mandible, with/without oral laceration, without airway involvement, unstable, requiring open reduction
- 050 Fracture, mandible, with/without oral laceration, without airway involvement, mild displacement, stable
- 051 Eye wound, severe - loss of intraocular fluid, with/without retinal detachment, eye not salvageable
- 052 Eye wound, lacerated, penetrated with retinal injury, eye salvageable
- 053 Eye wound, lacerated, moderate - without retinal detachment or retinal injury, no foreign body retained, without loss of vitreous fluid, patient has hyphema, eye salvageable
- 054 Eye wound, chemical burn
- 055 Wound, tympanic membrane, perforated, lacerated, ruptured, severe - involvement of middle ear ossicles
- 056 Wound, tympanic membrane, perforated, lacerated, ruptured, moderate - involvement of drum only
- 057 Fracture, spine, closed, without cord damage, unstable lesion
- 058 Fracture, spine, closed, without cord damage, stable lesion
- 059 Fracture, spine, closed, with cord damage, cervical spine with respiratory involvement
- 060 Fracture, spine, closed, with cord damage, below cervical spine (progressive)
- 061 Fracture, spine, open, with cord damage, cervical spine with respiratory distress
- 062 Fracture, spine, open, with cord damage, below cervical spine (progressive)
- 063
- 064 Fracture, clavicle, closed, all cases

PCPATIENT DESCRIPTION

- 065 Wound, shoulder girdle, open, with bone injury, severe - joint involvement
- 066 Wound, shoulder girdle, open, with bone injury, moderate -- no joint involvement
- 067 Fracture, humerus, closed, upper shaft, all cases
- 068 Wound, upper arm, open, penetrating, lacerated, without fracture, severe - with nerve injury
- 069 Wound, upper arm, open, penetrating lacerated, without fracture, severe - with vascular injury
- 070 Wound, upper arm, open, penetrating, lacerated, without fracture, moderate - without nerve or vascular injury
- 071 Wound, upper arm, open with fractures and nerve and vascular injury, arm non-salvageable
- 072 Wound, upper arm, open with fractures and nerve injury, no vascular injury, arm salvageable
- 073 Fracture, radius and ulna, closed, severe - shafts of bones
- 074 Fracture, radius and ulna, closed, moderate - colles fracture
- 075 Wound, forearm, open, lacerated, penetrating, without bone, nerve or vascular injury, with major loss of muscle tissue, severe - requiring major debridement
- 076 Wound, forearm, open, lacerated, penetrating, without bone, nerve or vascular injury, moderate - not requiring major debridement
- 077 Wound, forearm, open, lacerated, penetrating, with fracture and with nerve and vascular injury, forearm not salvageable
- 078 Wound, forearm, open, lacerated, penetrating, with fracture and with nerve and vascular injury, forearm salvageable
- 079 Fracture, hand or fingers, closed, severe - requiring closed reduction
- 080 Fracture, hand and/or fingers, closed, moderate - not requiring closed reduction

PCPATIENT DESCRIPTION

- 081 Wound, hand and/or fingers, open, lacerated without fractures, severe - superficial and deep tendon involvement
- 082 Wound, hand and/or fingers, open, lacerated without fractures, moderate - no tendon involvement or limited to sublimis tendon involvement
- 083 Wound, hand, open, lacerated, contused, crushed, with fracture(s), all cases - involving fractures of carpals and/or metacarpals
- 084 Wound, fingers, open, lacerated, contused, crushed, with fracture(s) of phalangeals, requiring rehabilitation
- 085 Wound, fingers, open, lacerated, contused, crushed, with fracture(s) of phalangeals, not requiring rehabilitation
- 086 Crush injury, upper extremity, severe - limb not salvageable
- 087 Crush injury, upper extremity, moderate - limb salvageable
- 088 Dislocation/fracture, elbow, closed, acute
- 089 Amputation, hand, traumatic, complete, all cases
- 090 Amputation, forearm, traumatic, complete, all cases
- 091 Amputation, full arm, traumatic, complete, all cases
- 092
- 093 Fracture, rib, closed, severe - multiple fractures
- 094 Fracture, rib, closed, moderate - single fracture
- 095 Injury, lung, closed (blast, crush) with pneumothorax, severe - one lung with pulmonary contusion and acute, severe respiratory distress
- 096 Injury, lung, closed (blast, crush) with pneumothorax, moderate - one lung with pulmonary contusion and respiratory distress
- 097 Wound, thorax (anterior or posterior), open, superficial, lacerated, contused, abraded, avulsed, requiring major debridement
- 098 Wound, thorax (anterior or posterior), open, superficial, lacerated, contused, abraded, avulsed, not requiring major debridement

PC

PATIENT DESCRIPTION

- 099 Wound, thorax (anterior or posterior), open, penetrating, with associated rib fractures and pneumohemothorax, acute, severe respiratory distress
- 100 Wound, thorax (anterior or posterior), open, penetrating, with associated rib fractures and pneumohemothorax, moderate respiratory distress
- 101 Wound, heart, open, penetrating, perforating, lacerating to include tamponade
- 102 Wound, abdominal wall (anterior or posterior), lacerated, abraded, contused, avulsed without entering abdominal cavity, severe - requiring major debridement
- 103 Wound, abdominal wall (anterior or posterior), lacerated, abraded, contused, avulsed without entering abdominal cavity, not requiring major debridement
- 104 Wound, liver, closed, acute (crush, fracture), major liver damage
- 105 Wound, liver, closed, acute (crush, fracture), minor liver damage
- 106 Wound, spleen, closed, acute (crush, fracture), all cases
- 107 Wound, abdominal cavity, open, with lacerating, penetrating, perforating wound to the large bowel
- 108 Wound, abdominal cavity, open, with lacerating, penetrating, perforating wound to the small bowel, without major or multiple resections
- 109 Wound, abdominal cavity, open, with penetrating, perforating wound of liver, major damage
- 110 Wound, abdominal cavity, open, with penetrating, perforating abdominal wound with lacerated liver
- 111 Wound, abdominal cavity, open, with penetrating, perforating wound of spleen
- 112 Wound, abdominal cavity, open, with lacerated, penetrated, perforated wound with shattered kidney

PCPATIENT DESCRIPTION

- 113 Wound, abdominal cavity, open, with lacerated, penetrating, perforating wound with lacerated kidney, initially repaired, but subsequent nephrectomy
- 114 Wound, abdominal cavity, open, with lacerated, penetrating, perforating wound, kidney, moderate - kidney salvageable
- 115 Wound, abdominal cavity, open, with lacerated, penetrating, perforating wound with shattered bladder
- 116 Wound, abdominal cavity, open, with lacerated, penetrating, perforating wound with lacerated bladder
- 117 Wound, buttocks, severe - open, lacerated, penetrating, perforating, and avulsed
- 118 Wound, buttocks, moderate - open, lacerated, contused and abraded
- 119 Displaced fracture of pelvis, closed, with associated soft tissue damage and pelvic organ damage
- 120 Non-displaced fracture of pelvis, closed, with associated soft tissue damage
- 121 Wound, abdomen, open, with pelvic fracture and penetrating, perforating wounds to multiple pelvic structures (male or female)
- 122 Wound, abdomen, open, with pelvic fracture and penetrating, perforating wounds to pelvic colon only (male or female)
- 123 Wound, external genitalia, male, severe - lacerated, avulsed, crushed
- 124 Wound, external genitalia, male, moderate - abraded, contused
- 125 Wound, external genitalia, female, severe - lacerated, avulsed, crushed
- 126 Wound, external genitalia, female, moderate - abraded, contused
- 127
- 128 Fracture, closed, femur, shaft, all cases
- 129 Wound, thigh, open, without fracture, nerve or vascular injury, requiring major debridement

<u>PC</u>	<u>PATIENT DESCRIPTION</u>
130	Wound, thigh, open, without fracture, nerve or vascular injury, not requiring major debridement
131	Wound, thigh, open, lacerated, penetrating, perforating, with fracture and nerve/vascular injury, limb not salvageable
132	Wound, thigh, open, lacerated, penetrating, perforating, with fracture and nerve injury, limb salvageable
133	Wound, thigh, open, lacerated, penetrating, perforating, with fracture and vascular injury, limb salvageable
134	Wound, knee, open, lacerated, penetrating, perforating, with joint space penetration, shattered knee
135	Wound, knee, open, lacerated, penetrating, perforating, with joint space penetration, articular cartilage damage, no bone injury
136	Wound, knee, open, lacerated, penetrating, perforating, with joint space penetration, no bone or articular cartilage injury
137	Fracture, closed, tibia and fibula, shaft, all cases
138	Wound, lower leg, open, lacerated, penetrating, perforating, without fractures, requiring major debridement
139	Wound, lower leg, open, lacerated, penetrating, perforating, without fractures, not requiring major debridement
140	Wound, lower leg, open, lacerated, penetrating, perforating, with fracture and nerve/vascular injury, limb not salvageable
141	Wound, lower leg, open, lacerated, penetrating, perforating, with fracture and nerve injury, limb salvageable
142	Wound, lower leg, open, lacerated, penetrating, perforating, with fracture and vascular injury, limb salvageable
143	Fracture, ankle/foot, closed, displaced, requiring reduction
144	Fracture, ankle/foot, closed, nondisplaced, not requiring reduction
145	Wound, ankle, foot, toes, open, lacerated, contused, without fractures, but requiring major debridement

PCPATIENT DESCRIPTION

- 146 Wound, ankle, foot, toes, open, lacerated, contused, without fractures, not requiring major debridement
- 147 Wound, ankle, foot, toes, open, penetrating, perforating, with fractures and nerve/vascular injury, limb not salvageable
- 148 Wound, ankle, foot, toes, open, penetrating, perforating, with fractures and nerve injury, limb salvageable
- 149 Wound, ankle, foot, toes, open penetrating, perforating, with fractures and vascular injury, limb salvageable
- 150 Crush injury, lower extremity, limb not salvageable
- 151 Crush injury, lower extremity, limb salvageable
- 152 Amputation, foot, traumatic, complete, all cases
- 153 Amputation, below knee, traumatic, complete, all cases
- 154 Amputation, above knee, traumatic, complete
- 155 Amputation, traumatic, complete, requiring hip disarticulation
- 156
- 157 Burn, thermal, full thickness, lower extremities and genitalia, greater than 30% but less than 40% of total body area involved
- 158 Burn, thermal, full thickness, trunk, greater than 20% but less than 30% of total body area involved
- 159 Burn, thermal, full thickness, lower extremity and genitalia, greater than 15% but less than 30% of total body area involved
- 160 Burn, thermal, full thickness, upper extremities, greater than 10% but less than 20% of total body area involved
- 161 Burn, thermal, full thickness, trunk, greater than 10% but less than 20% of total body area involved
- 162 Burn, thermal, full thickness, head and neck, greater than 5% but less than 10% of total body area with eye involvement
- 163 Burn, thermal, full thickness, upper extremity, less than 10% of total body area involved

PCPATIENT DESCRIPTION

- 164 Burn, thermal, full thickness, head and neck, less than 5% of total body area and no eye involvement
- 165 Burn, thermal, partial thickness, lower extremities and genitalia, greater than 30% but less than 40% of total body area involved
- 166 Burn, thermal, partial thickness, trunk, greater than 20% but less than 30% of total body area involved
- 167 Burn, thermal, partial thickness, lower extremity and genitalia, greater than 15% but less than 30% of total body area involved
- 168 Burn, thermal, partial thickness, upper extremities, greater than 10% but less than 20% of total body area involved
- 169 Burn, thermal, partial thickness, trunk, greater than 10% but less than 20% of total body area involved
- 170 Burn, thermal, partial thickness, head and neck, greater than 5% but less than 10% of total body area and/or eye involvement
- 171 Burn, thermal, partial thickness, upper extremity, less than 10% of total body area involved
- 172 Burn, thermal, partial thickness, head and neck, less than 5% of total body area and no eye involvement
- 173 Burn, thermal, superficial, lower extremities and genitalia, greater than 30% but less than 40% of total body area involved
- 174 Burn, thermal, superficial, trunk, greater than 20% but less than 30% of total body area involved
- 175 Burn, thermal, superficial, lower extremity and genitalia, greater than 15% but less than 30% of total body area involved
- 176 Burn, thermal, superficial, upper extremities, greater than 10% but less than 20% of total body area involved
- 177 Burn, thermal, superficial, trunk, greater than 10% but less than 20% of total body area involved
- 178 Burn, thermal, superficial, head and neck, greater than 5% but less than 10% of total body area and/or eye involvement

PCPATIENT DESCRIPTION

- 179 Burn, thermal, superficial, upper extremity, less than 10% of total body area involved
- 180 Burn, thermal, superficial, head and neck, less than 5% of total body area and no eye involvement
- 181 Burns, phosphorous (WP), all cases
- 182
- 183
- 184 Dislocation, temporomandibular joint, subluxation without fracture, chronic, requiring correction
- 185 Dislocation, temporomandibular joint, subluxation without fracture, acute, initial injury
- 186 Intervertebral disc disorders with nerve root compression, resistant bed rest/traction
- 187 Intervertebral disc disorders with nerve root compression, responding to bed rest/traction
- 188 Strain, lumbosacral, sacroiliac joint, chronic, all cases
- 189 Strains and sprains, sacroiliac region, severe - non-ambulatory
- 190 Strains and sprains, sacroiliac region, moderate - ambulatory
- 191 Dislocation, shoulder, closed, acute, all cases
- 192 Dislocation, elbow, closed, acute
- 193 Tenosynovitis, elbow, wrist, shoulders, etc.
- 194 Dislocation, hand or wrist, closed, acute
- 195 Dislocation, hand, wrist, fingers, closed, acute, fingers
- 196 Sprain, wrist, closed, acute, all cases
- 197 Sprain, thumb, closed, acute, severe
- 198 Sprain, fingers, closed, acute, moderate - no thumb involvement

<u>PC</u>	<u>PATIENT DESCRIPTION</u>
199	Dislocation, hip, closed, acute, all cases
200	Tear, ligaments, knee, acute, complete rupture
201	Tear, ligaments, knee, acute, incomplete rupture
202	Internal derangement of knee, chronic, with torn meniscus and/or ligament laxity
203	Chondromalacia
204	Sprain, ankle, closed, acute, with complete ligament rupture
205	Sprain, ankle, closed, acute, grade 2, incomplete ligament rupture
206	Dislocation, toes, closed, acute, all cases
207	Trench foot, immersion foot, severe - vesicle formation
208	Trench foot, immersion foot, moderate - no vesicle formation
209	Chilblains, all cases
210	Frostbite, full skin thickness or deeper involvement
211	Frostbite, less than full skin thickness
212	Hypothermia, all cases
213	Heat stroke
214	Heat exhaustion
215	Heat cramps, all cases
216	Blisters, hand, fingers, foot, toes, due to friction, acute, moderate - all cases
217	Insect bites and stings (unspecified body area) with systemic symptoms and/or respiratory difficulty
218	Insect bites and stings (unspecified body area), moderate - localized symptoms
219	Animal bites and rabies exposure

PCPATIENT DESCRIPTION

- 220 Near drowning
- 221 Toxic inhalation
- 222
- 223
- 224 Appendicitis, acute, with perforation, rupture, peritonitis
- 225 Appendicitis, acute, without perforation, rupture, peritonitis
- 226 Inguinal hernia, complicated, direct or indirect, sliding, incarceration of bowel
- 227 Inguinal hernia, uncomplicated, direct or indirect, no sliding, no incarceration of bowel or bladder
- 228 Boils, furuncles, pyoderma, requiring surgery
- 229 Pilonidal cyst/abscess, requiring major excision
- 230 Peptic ulcer, gastric or duodenal, penetrating and/or perforating
- 231 Hemorrhoidal disease
- 232 Cholecystitis with cholelithiasis, all cases
- 233 Facial cellulitis and infection, involvement of facial spaces, sinuses and/or salivary glands, airway involvement
- 234 Facial cellulitis and infection, involvement of facial spaces, sinuses and/or salivary glands, no airway obstruction
- 235 Cellulitis, involving face or weight bearing areas
- 236 Cellulitis, other than face or weight bearing areas
- 237 Pilonidal cyst/abscess, requiring minor incision
- 238 Ingrown toenails, bilateral, with secondary infections unresolvable at echelon 2
- 239 Ingrown toenails, without secondary infection

<u>PC</u>	<u>PATIENT DESCRIPTION</u>
240	Eczema, dermatitis, seborrheic, contact, others, affecting weight bearing or pressure areas
241	Eczema, dermatitis, seborrheic, contact, others, not affecting weight bearing areas
242	Boils, furuncles, pyoderma, not requiring surgery
243	Dermatophytosis, severe - affecting feet
244	Dermatophytosis, all other cases
245	Pediculosis, all cases
246	Scabies, all cases
247	Herpes simplex and zoster, without encephalitis, all types, all cases
248	Hyperhydrosis, all cases
249	Blepharitis, all cases
250	Conjunctivitis, severe - all cases
251	Conjunctivitis, moderate - all cases
252	Trachoma, all cases
253	Corneal ulcer
254	Corneal abrasion
255	Iridocyclitis, acute, marked visual impairment
256	Iridocyclitis, acute, minimal visual impairment
257	Refraction and accommodation disorders, refraction required
258	Refraction and accommodation disorders, replacement of spectacles required
259	Otitis externa, all cases
260	Otitis media, acute, suppurative, all cases
261	Mastoiditis, chronic, all cases

<u>PC</u>	<u>PATIENT DESCRIPTION</u>
262	Hearing impairment
263	
264	Allergic rhinitis, all cases
265	Upper respiratory infections, acute, all cases
266	Bronchitis, acute, all cases
267	Asthma, with disabling symptoms or repeated attacks
268	Asthma, other cases
269	Adult respiratory distress syndrome, severe
270	Adult respiratory distress syndrome, moderate
271	Food poisoning, staphylococcal, disabling symptoms
272	Food poisoning, staphylococcal, moderate symptoms
273	Diarrheal disease, severe
274	Diarrheal disease, moderate
275	Gastritis, acute, all cases
276	Peptic ulcer, gastric or duodenal, uncomplicated
277	Regional ileitis, disabling symptoms, unresponsive to treatment
278	Regional ileitis, responds to treatment
279	Helminthiasis, all cases
280	Intracranial hemorrhage, spontaneous, nontraumatic, severe - comatose or semicomatose with possible respiratory distress without associated hematoma
281	Intracranial hemorrhage, spontaneous, nontraumatic, moderate - awake without respiratory distress or severe neurologic deficit
282	Essential hypertension
283	Ischemic heart disease

<u>PC</u>	<u>PATIENT DESCRIPTION</u>
284	Phlebitis, deep vein involvement
285	Phlebitis, superficial vein involvement
286	Sexually transmitted diseases (STD), genital ulcers and/or adenopathy
287	Sexually transmitted diseases (STD), complicated
288	Sexually transmitted diseases (STD), urethritis
289	Glomerulonephritis, acute
290	Glomerulonephritis, chronic
291	Pyelonephritis, acute, no obstruction
292	Nephrotic syndrome, all cases
293	Ureteral calculus, not causing obstruction
294	Epididymitis, cystitis, prostatitis, acute, all cases
295	Balanoposthitis, all cases
296	Pyelonephritis, acute, secondary to obstruction
297	Ureteral calculus, causing obstruction, impacted
298	
299	Migraine, all cases
300	Meningo-encephalitis, complicated
301	Meningo-encephalitis, uncomplicated
302	Mumps, all cases
303	Infectious mononucleosis, all cases
304	Hepatitis, infectious, viral, all cases
305	Pancreatitis, acute, all cases
306	Cirrhosis, severe - hemorrhagic complications

<u>EC</u>	<u>PATIENT DESCRIPTION</u>
307	Cirrhosis, moderate - no hemorrhage
308	Malaria, severe - all species
309	Malaria, moderate - all species
310	Febrile illness, acute, severe - except malaria and pneumonia
311	Febrile illness, acute, moderate
312	Cutaneous ulcers, including leishmaniasis
313	Joint disorders, including septic
314	Motion sickness
315	Diabetes mellitus
316	Thyroid disorder
317	Anemia, all cases
318	Schistosomiasis, all cases
319	Neoplasms, malignant
320	Neoplasms, benign
321	Psychosis
322	Conduct disorders
323	Non-psychotic mental disorders
324	Alcohol dependency, severe - impending or actual DTs
325	Alcohol dependency syndrome, moderate
326	Alcohol misuse, simple intoxication
327	Drug dependency (other than alcohol), severe
328	Drug misuse (other than alcohol), severe - atypical, no dependency
329	Drug misuse (other than alcohol), mild or moderate

PC

PATIENT DESCRIPTION

330

331

332 Stress reaction, severe - unresponsive to treatment

333 Stress reaction, severe - delayed improvement

334 Stress reaction, severe - moderate

335 Stress reaction, moderate

336 Stress reaction, acute, moderate-mild

337 Stress reaction, acute, mild

338

339

340 Dysfunctional uterine bleeding

341 Dysmenorrhea, amenorrhea

342 Pelvic inflammatory disease (PID) all cases

343 Cervicitis, endocervicitis, with symptomatic leukorrhea

344 Vulvovaginitis

345 Tubal pregnancy, impending rupture/rupture

346 Tubal pregnancy, not ruptured

347 Abortion, spontaneous with hemorrhage

348 Pregnancy, uncomplicated

TABLE 3. PATIENT CONDITION CRITERIA LACKING ICD-9 EQUIVALENTS
OR EXACT TRANSLATIONS*

<u>PC</u>	<u>COMPONENT LACKING ICD-9 PARALLEL</u>
001	sucking wound
005	shock
006	shock
013	vascular injury
021	without fracture or neurovascular injury
024	soft tissue injury
025	soft tissue injury
028	skin and soft tissue
031	with/without nondepressed linear skull fracture severe - from 2 - 12 hours
032	with/without nondepressed linear skull fracture moderate - less than 2 hours
033	with/without nondepressed linear skull fracture severe
034	with/without nondepressed linear skull fracture moderate - from 12 - 24 hours, without focal neurological deficit
035	with intracranial hematoma, with/without nondepressed linear skull fracture severe - large hematoma (including epidural hematoma) with rapidly deteriorating comatose patient
036	Cerebral contusion, closed, with/without nondepressed linear skull fracture severe - with/without focal neurological deficit
037	with depressed skull fracture severe - with massive depression

* Patient condition criteria with inexact ICD-9 translations are in bold text.

PC COMPONENT LACKING ICD-9 PARALLEL

- 038 with depressed moderate skull fracture - no associated hematoma or significant effect from depression
- 039 severe - depressed skull fracture with intracranial fragments
- 040 moderate - without intracranial fragments and/or depressed skull fracture
- 041 wound scalp open without cerebral injury or skull fracture severe - scalped with avulsion of tissue
- 042 open without cerebral injury or skull fracture moderate - scalp laceration
- 043 severe fractures
- 044 moderate fractures
- 045 jaws and neck, open, lacerated with associated fractures, excluding spinal fractures, severe
- 046 open, lacerated excluding spinal fractures, moderate - without airway obstruction
- 047 face, open, lacerated, contused without fractures, severe, or major vessel involvement
- 048 contused without fractures, moderate - without airway obstruction or major vessel involvement
- 049 without airway involvement, unstable, requiring open reduction
- 050 without airway involvement, mild displacement, stable
- 052 lacerated
- 053 lacerated, moderate - no foreign body retained, without loss of vitreous fluid, patient has hyphema
- 055 tympanic membrane, perforated, lacerated, ruptured, severe
- 056 perforated, lacerated, ruptured, moderate - involvement of drum only
- 057 unstable lesion
- 058 stable lesion

<u>PC</u>	<u>COMPONENT LACKING ICD-9 PARALLEL</u>
059	respiratory involvement
060	(progressive)
061	with respiratory distress
062	(progressive)
065	with bone injury, severe - joint involvement
066	with bone injury, moderate - no joint involvement
067	upper
068	penetrating, lacerated, without fracture, severe
069	penetrating lacerated, severe
070	penetrating, lacerated, without fracture, moderate - without nerve or vascular injury
073	severe
074	moderate
075	lacerated, penetrating, without bone, nerve or vascular injury, with major loss of muscle tissue, severe - requiring major debridement
076	lacerated, penetrating, moderate - not requiring major debridement
077	lacerated, penetrating, nerve and vascular injury
078	lacerated, penetrating, nerve and vascular injury
079	requiring closed reduction
080	moderate - not requiring closed reduction
081	lacerated without fractures, severe
082	lacerated without fractures, moderate - limited to sublimis tendon involvement
083	lacerated, contused, crushed, involving fractures of carpals and/or metacarpals

<u>PC</u>	<u>COMPONENT LACKING ICD-9 PARALLEL</u>
084	lacerated, contused, requiring rehabilitation
085	lacerated, contused, not requiring rehabilitation
087	moderate
088	acute
093	severe
094	moderate
095	severe - one lung with pulmonary contusion and acute, severe respiratory distress
097	superficial, lacerated, contused, abraded, avulsed, requiring major debridement
098	superficial, lacerated, contused, abraded, avulsed, not requiring major debridement
099	penetrating, acute, severe respiratory distress
100	thorax (anterior or posterior), penetrating, moderate respiratory distress
101	penetrating, perforating, lacerating to include tamponade
102	lacerated, abraded, contused, avulsed without entering abdominal cavity, severe - requiring major debridement
103	lacerated, abraded, contused, avulsed without entering abdominal cavity, not requiring major debridement
104	acute (crush, fracture)
105	acute (crush, fracture)
106	acute (crush, fracture), all cases
107	abdominal cavity, with lacerating, penetrating, perforating wound to the large bowel
108	abdominal cavity, with lacerating, penetrating, perforating wound to the small bowel, without major or multiple resections

<u>PC</u>	<u>COMPONENT LACKING ICD-9 PARALLEL</u>
109	abdominal cavity, with penetrating, perforating wound of liver, major damage
110	abdominal cavity, with penetrating, perforating abdominal wound with lacerated liver
111	abdominal cavity, with penetrating, perforating
112	with lacerated, penetrated, perforated wound with shattered kidney
113	penetrating, perforating wound, initially repaired, but subsequent nephrectomy
114	penetrating, perforating wound, kidney, moderate
115	with lacerated, penetrating, perforating wound with shattered bladder
116	with lacerated, penetrating, perforating wound with lacerated bladder
117	severe - open, lacerated, penetrating, perforating, and avulsed
118	moderate - open, lacerated, contused and abraded
119	displaced fracture, with associated soft tissue damage
120	non-displaced fracture, with associated soft tissue damage
121	penetrating, perforating wounds to multiple pelvic structures
122	penetrating, perforating wounds to pelvic colon only (male or female)
123	severe - lacerated, avulsed, crushed
124	moderate - abraded
125	severe - lacerated, avulsed, crushed
126	moderate - abraded, contused
129	without fracture, nerve or vascular injury, requiring major debridement

<u>PC</u>	<u>COMPONENT LACKING ICD-9 PARALLEL</u>
130	without fracture, nerve or vascular injury, not requiring major debridement
131	lacerated, penetrating, perforating
132	lacerated, penetrating, perforating, limb salvageable
133	thigh, lacerated, penetrating, perforating, limb salvageable
134	lacerated, penetrating, perforating, with joint space penetration
135	lacerated, penetrating, perforating, with joint space penetration, articular cartilage damage, no bone injury
136	lacerated, penetrating, perforating, with joint space penetration, no bone or articular cartilage injury
138	lacerated, penetrating, perforating, without fractures, requiring major debridement
139	lacerated, penetrating, perforating, not requiring major debridement
140	lacerated, penetrating, perforating
141	lacerated, penetrating, perforating
142	lacerated, penetrating, perforating
143	displaced, requiring reduction
144	nondisplaced, not requiring reduction
145	lacerated, contused, without fractures, but requiring major debridement
146	lacerated, contused, not requiring major debridement
147	penetrating, perforating
148	penetrating, perforating
149	penetrating, perforating
155	traumatic, complete, requiring hip disarticulation
159	thermal, full thickness, greater than 15%

<u>PC</u>	<u>COMPONENT LACKING ICD-9 PARALLEL</u>
162	greater than 5%, eye involvement
164	less than 5%, no eye involvement
167	greater than 15% less than 20%
170	greater than 5%, eye involvement
172	less than 5% of total, no eye involvement
175	greater than 15%
178	greater than 5%, eye involvement
180	less than 5%, no eye involvement
181	burns, phosphorous (WP), all cases
184	subluxation without fracture, chronic, requiring correction
185	temporomandibular joint, subluxation without fracture, acute, initial injury
186	with nerve root compression, resistant bed rest/traction
187	with nerve root compression, responding to bed rest/traction
188	lumbosacral, chronic, all cases
189	severe
190	moderate-ambulatory
191	acute
192	acute
194	acute
195	acute
196	acute
197	acute, severe
198	acute, moderate-no thumb involvement

<u>PC</u>	<u>COMPONENT LACKING ICD-9 PARALLEL</u>
199	acute
200	tear, ligaments, knee, acute, complete rupture
201	tear, ligaments, knee, acute, incomplete rupture
202	chronic, with torn meniscus and/or ligament laxity
204	acute, with complete ligament rupture
205	closed, acute, grade 2, incomplete ligament rupture
206	acute
207	trench foot, immersion foot, severe - vesicle formation
208	trench foot, immersion foot, moderate - no vesicle formation
209	chilblains, all cases
210	full skin thickness or deeper involvement
211	frostbite, less than full skin thickness
216	moderate-all cases
224	with perforation, rupture
225	without perforation, rupture
226	complicated, sliding
227	uncomplicated, no sliding
230	and/or penetrating
235	involving face or weight bearing areas
236	other than face or weight bearing areas
238	bilateral, with secondary infections unresolvable at echelon 2
240	seborrheic, contact, others, affecting weight bearing or pressure areas
241	seborrheic, contact, others, not affecting weight bearing areas

<u>PC</u>	<u>COMPONENT LACKING ICD-9 PARALLEL</u>
243	severe
248	hyperhydrosis
250	severe
251	moderate
255	acute, marked visual impairment
257	refraction and accommodation disorders, refraction required
267	with disabling symptoms or repeated attacks
271	disabling symptoms
272	moderate symptoms
273	severe
274	moderate
277	regional ileitis, disabling symptoms, unresponsive to treatment
278	responds to treatment
280	spontaneous, severe - semicomatose with possible respiratory distress without associated hematoma
281	spontaneous, moderate - awake without respiratory distress or severe neurologic deficit
286	and/or adenopathy
287	complicated
293	not causing obstruction
296	acute, secondary to obstruction
297	causing obstruction, impacted
300	encephalitis, complicated
301	encephalitis, uncomplicated

<u>PC</u>	<u>COMPONENT LACKING ICD-9 PARALLEL</u>
306	severe - hemorrhagic complications
307	moderate - no hemorrhage
308	severe
309	moderate
310	acute, severe
311	acute, moderate
328	severe - atypical, no dependency
329	mild or moderate
332	stress reaction, severe - unresponsive to treatment
333	stress reaction, severe - delayed improvement
337	stress reaction, acute, mild
345	impending rupture/rupture
346	not ruptured

19. ABSTRACT (Continue on reverse if necessary and identify by block number) Combat preparedness requires accurate projections of the medical resources that will be needed in a theater of operations. The Deployable Medical Systems (DEPMEDS) initiative projects the required medical supplies based on the anticipated frequencies of occurrence within a set of Patient Conditions (PCs). A recent investigation of Marine hospitalizations in Vietnam found that the PCs accounted for only 73 percent of the battle injuries and 63 percent of the disease admissions. The present investigation examined the disparity between PC codes and actual hospital diagnoses. The specificity and multiplicity of the PC criteria often prevented accurate conversions from the International Classification of Diseases (ICD-9) codes in use at treatment facilities. Some PC criteria could be accommodated using similar yet inexact matches while other were not translatable. Additionally, some hospital admissions were unaccounted for using the PC system. A diagnoses system based on ICD-9 classifications and encompassing all admissions in a theater of operations was proposed.
